

“WHAT’S NEW”

TEC Sales, LLC

They say "timing is everything" due to a number of events that have happened in the last year and the Grace of God, we have decided to put our combined 40 years of experience in the electrical distribution and manufacturing environments to build TEC Sales. We know you will find TEC Sales the most energetic and responsive rep company that you will deal with in our industry. By utilizing our technical knowledge and "Whatever it Takes" mentality we are looking forward to many years of success.

New Products

Thermal Edge - Class 1 Division II - Air to Air Heat Exchangers

Air to Air Heat Exchangers are used when the Delta T or outside air is at least 10-15 degrees F below the interior heat load air temperature. Unlike a fan system that blows in dirty air and becomes useless as filters go unchanged, the A2A is closed loop utilizing the cool air outside to cool the interior equipment with a charged heat pipe core. This method of cooling is preferred over fans because the process is cleaner for the inside of the cabinet and much lower cost than a standard compressor driven air conditioner, not to mention low maintenance as they are filterless.

Wieland - Solar Connectors / Combiner Boxes

The new Wieland PST40i mates with the solar industry standard while delivering reduced DC arc fault. These connectors are tops in quality, easiest to terminate, and readily available. Wieland also now offers combiner boxes with or without disconnects in 8, 12, 24, and 30 string.
